### **DETAILED ACTION**

Applicant's election of Species I with claims 1-13 in the reply filed on 03/07/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a semiconductor integrated circuit device comprising a decoupling capacitor formed at an interface between the first conductivity type semiconductor substrate and second conductivity type semiconductor layer, classified in class 257, subclass 595.
  - II. Claims 24-34, drawn to a semiconductor integrated circuit device comprising a pn junction between the first region and second region acts as a decoupling capacitor suppressing a variation of at least one of voltage supplied by the first and second power supplies, classified in class 257, subclass 599.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a decoupling capacitor could be used for reducing the frequency noise for the circuitry, however invention II has separate utility such as a decoupling capacitor could suppress a variation of at least one of voltages supplied by first and second power supplies. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
